FOR IMMEDIATE RELEASE

## DVM PIGMENTS & ADDITIVES 'GOES GREEN' WITH VOC-FREE DISPERSIONS

30 March 2021  
Chorley, Lancashire

**DVM Pigments & Additives (DVM)**, a leading global manufacturer and supplier of aqueous pigment dispersions, organic and inorganic pigments, biocides, additives and technical solutions for a wide variety of industries, recently announced that it has updated its production process to create **environmentally-friendly dispersions** free of Volatile Organic Compounds (VOCs), Substances of Very High Concern (SVHC) and Alkyl Phenol Ethoxylates (APEO).

“The production updates underscore our commitment to employing business practices and technical solutions that are environmentally-conscious,” said **David Maltman, General Manager of DVM**. “Our next objective is to increase the amount of sustainable materials used in our formulations,” he continued.

By removing VOCs, SVHCs and APEOs from its dispersions, DVM’s technical solutions continue to provide end-consumer product developers and manufacturers with materials that are greener, safer and release less to no toxicity over time.
